

BLACK GOLD®

All the Riches of the Earth...

Recipe for a Living Wreath

Materials Needed:

Black Gold Potting Soil

Living Wreath Ring
(a two piece snap
together wire ring)

Green Moss

Water

Bucket

Plants of your choice
(a 20" ring will hold
about 20-21 plants)

- Soak green moss in bucket of water.
- Lay wire ring on a flat surface, rounded side down and remove flat top.
- Wring excess water from moss, layer moss in curved part of ring.
- Form a "ditch" in the thick layer of moss with your hand.
- Add moist Black Gold Potting Soil.*
- Snap on top half of wire ring.
- Plant moist plants in spacing through wire ring cover.
- Add more soil around plants until firm.
- Pack more layers of moss, surrounding plants until ring is full and plants are secure.

To care for your wreath, lay flat and water thoroughly, allowing water to drain. As plants grow, trim or pinch them back to retain desired shape.

*We recommend Black Gold All Organic for herbs, sedum and succulents, Black Gold CocoBlend™ for summer annuals and moisture loving plants or Black Gold All Purpose Potting Soil.

**Look for Black Gold
at your local garden center:**

Al's Garden Center -
Woodburn, Sherwood & Gresham

Aspen Grove Nursery - West Linn

Coastal Farm & Ranch -
Willamette Valley locations

Deep Creek Garden Center - Gresham
